

### Свойства

|                        |  |
|------------------------|--|
| Диапазон на използване | градинарство, селско стопанство в промишлени и строителни области като маркуч с ниско налягане |
| Вътрешен слой          | естествен и синтетичен гума  |
| Подложка               | много устойчива на скъсване, синтетична текстилна подложка                                     |
| Външен слой            | синтетична гума, устойчив на атмосферни условия  |
| Цвят                   | черен  |
| Температура min.       | -25 °C   |
| Температура max.       | 70 °C  |
| Течности               | вода<br>въздух   |

### Артикул

| Обозначение     | Цол    | Вътрешен Ø<br>(mm) | Външен Ø<br>(mm) | Работно налягане<br>(bar) | Разрушаващо налягане<br>(bar) | Радиус на огъване<br>мин.<br>(mm) | Дължина на ролката<br>(m) |
