

K-GRUNDEJEKTION SBP-C

Basic ejectors »SBP-C« with blow-off valve, with integrated silencer

HANSA**FLEX**

Свойства

Свойства	Vacuum generator with a single nozzle, available in six power ratings, with a high maximum vacuum value (85%) Connection of compressed air and vacuum with push-in coupling Basic housing with connection facility for a vacuum switch Maximum suction capacity with minimum compressed air consumption Minimum size, low weight Various power ratings for optimised air consumption
-----------------	---

Приложение	For universal use in handling systems with very high dynamic movements Handling all kinds of air-tight components For use in separation systems where space is restricted. InConstruction of ejector blocks for centralised or decentralised individual control of suction pads.
-------------------	---

система от дюзи	Brass
------------------------	-------

Съединение	Push-in coupling
-------------------	------------------

шумозаглушител	Plastic
-----------------------	---------

основен корпус	Impact-resistant plastic
-----------------------	--------------------------

Описание

Purely pneumatic vacuum ejector that operates on the Venturi principle. Compressed air enters the ejector at A and flows through the nozzle B. This results in a vacuum immediately behind the nozzle outlet, and air is drawn in through the vacuum inlet D. This air and the driving air leave the ejector via the silencer C.
