FORMENTRENN
Mould release

Properties

Temp. range	to + 130°C

Description

Silicone-free separating agent with outstanding anti-friction properties.

Additional information

The high-grade combination of active substances comprises pure natural products and prevents adhesion to plastics, forms, metals and tools in the temperature range to +130°C. Free from PCBs, CFCs and formaldehyde. The ejected workpieces can then normally be painted, printed or bonded. Application areas include plastic processing, extrusion, pressing and vacuum forming.
