REINIGER
Cleaning spray

Description
For repairs and fitting. Degreases all metals, glass, ceramic and most plastics.

Additional information
Thermoplastics such as PVC, PMMA (Plexiglas), polystyrene etc., as well single paint coating can be dissolved. Unlike conventional thinners, spray cleaner evaporates to leave no residues. The special valve also allows operatives to work above head height.
Applications: Brakes (drum/disc brakes, linings, blocks, cylinders, springs and sleeves), clutches (clutch linings/parts), engine parts (carburettor, petrol/oil pumps, transmission, etc.), use on products where a greasy underlay would impair the desired effect
