

AKF HL / AKF HS

Breakaway coupling (fixed)

Properties

Application	Automotive engineering
Connection 1	metric cylindrical outer thread
Sealing form 1	24° inner cone
Residual pressure:	Coupling under residual pressure is possible
Mineral oil temp. min.	-40 °C
Mineral oil temp. max.	100 °C
Material	Steel coupling, steel housing, malleable cast iron above DN 12.
Surface	electro galvanised

Description

Quick release couplings uncouple automatically under excessive tensile load, preventing separation of the hose lines.

Additional information

Flat seal tappets ensure minimal oil leakages and air admittance when coupling.

The robust construction makes them ideal for use in harsh conditions.
