

Properties				
Application	General application, e.g. in industry, construction machinery, agricultural technology etc.			
Connection 1	UN/UNF external threads			
Sealing form 1	74° outer cone			
Residual pressure:	Coupling under residual pressure is possible			
Material	Steel			
Surface	electro galvanised			

## Description

Screw couplings are designed for high pressures and pressure pulses. It is recommended to combine only couplings same manufacturer.

## **Additional information**

If fitted correctly, the screw sleeve completely covers the brake ring.

The self-locking thread prevents unwanted loosening due to vibrations.

The robust construction makes them ideal for use in harsh conditions.
