

Properties				
Application	General application, e.g. in industry, construction machinery, agricultural technology etc.			
Connection 1	UN/UNF external threads			
Sealing form 1	74° outer cone			
Residual pressure:	Coupling under residual pressure is possible			
Material	Steel			
Surface	electro galvanised			

Description

Screw couplings are designed for high pressures and pressure pulses. It is recommended to combine only couplings same manufacturer.

Additional information

If fitted correctly, the screw sleeve completely covers the brake ring.

The self-locking thread prevents unwanted loosening due to vibrations.

The robust construction makes them ideal for use in harsh conditions.
