SKF IM Screw coupling (fixed)

Properties

Application	General application, e.g. in industry, construction machinery, agricultural technology etc.				
Connection 1	metric cylindrical inner thread				
Sealing form 1	for screw-in pins with shapes A, B and if necessary E				
Residual pressure:	Coupling under residual pressure is possible				
Material	Steel				
Surface	electro galvanised				

Description

Screw couplings are designed for high pressures and pressure pulses. It is recommended to combine only couplings same manufacturer.

Ordering information

Other pressure and temperature figures available on request.

Additional information

If fitted correctly, the screw sleeve completely covers the brake ring. The self-locking thread prevents unwanted loosening due to vibrations.

The robust construction makes them ideal for use in harsh conditions.
