

SKF SF6

Screw coupling (fixed)

Properties

Application	General application, e.g. in industry, construction machinery, agricultural technology etc.
Connection 1	SAE flange 6000 PSI
Sealing form 1	flat seal with SF O-ring
Residual pressure:	Coupling under residual pressure is possible
Material	Steel
Surface	electro galvanised

Description

Screw couplings are designed for high pressures and pressure pulses.

Additional information

The self-locking thread prevents unwanted loosening due to vibrations.
If fitted correctly, the screw sleeve completely covers the brake ring.
The robust construction makes them ideal for use in harsh conditions.
