

# SKL IR F SN78 SK

Screw coupling (loose)

**HANSA FLEX**

## Properties

|                           |   |
|---------------------------|---|
| <b>Application</b>        | Industry and automotive engineering                   |
| <b>Design</b>             | Snap-tite series 78                                   |
| <b>Connection 1</b>       | BSP cylindrical internal threads                      |
| <b>Sealing form 1</b>     | for screw-in pins with shapes A, B and if necessary E |
| <b>Residual pressure:</b> | Coupling under residual pressure is possible          |
| <b>Additional feature</b> | Hexagonal design                                      |
| <b>Material</b>           | Brass   |

## Description

Screw couplings are designed for high pressures and pressure pulses.

## Additional information

The robust construction makes them ideal for use in harsh conditions.

## Item

| Identification      | DN* | Connecting thread | Operating pressure<br>(bar) | Mineral oil temp. min.<br>(°C) | Mineral oil temp. max.<br>(°C) | SF coup.* |
