

Properties

Application	Low pressure applications with hydraulic fluids and aggressive media
Application	Mainly for the chemical and food industries
Design	coil-corrugated PTFE inliner in black PTFE antistatic design
Properties	The inliner flanged connection fittings impart good self-cleaning properties when media are passed through the hoses The through-led product is only in contact with the PTFE material
Hose material	PTFE (polytetrafluoroethylene)
Braiding	without braiding
Temp. min.	-70 °C
Temp. max.	260 °C
Temp.	applies for the hose only
Approval	the base material has been granted FDA approval.

Note

The pressure values listed apply to hoses only.

 The tubular fabric has a safety factor (SF) 3 against bursting

 From 120 °C the pressure reduction factor is to be taken into account.

 (Max. operating pressure = operating pressure x factor).

 Temp.: 120 °C / 140 °C / 160 °C / 180 °C / 200 °C / 220 °C

 Factor: 1,00 / 0,80 / 0,60 / 0,40 / 0,20 / 0,00

Ordering information

AFSA design with 1.4301 / 1.4306 stainless steel braiding upon request.
 AFSP design with polypropylene braiding (suitable for use up to max. 90°C) upon request.
