

## **Properties**

Application primarily in the construction machinery sector

## Note

Installation: The retaining piece is welded or screwed upright or horizontally flat onto the machine body. The two halves of the clamp are screwed onto the retaining piece.

## **Description**

The steel pipe clamp is used for (subsequent) installation of hydraulic pipes and hose lines.

## Additional information

The robust construction of the clamp dampens impacts and vibrations. It can be supplemented with an elastomer insert (HSRS EE).

Item			
Identification	A (mm)	Ø D (mm)	
HSRS 25	52,5	25	
HSRS 30	55,0	30	
HSRS 35	57,5	35	
HSRS 38	59,0	38	
HSRS 42	61,0	42	
HSRS 50	65,0	50
