

HK FDCV

Flow divider / combiner FDCV

HANSA FLEX

Properties

Design	pressure-compensated
Operating pressure	max. 350 bar

Note

The greatest division accuracy is achieved in the range of the max. intake volumetric flow.
These valves can also be used for combining volumetric flows. (see circuit symbol)
Tightening torque for valve size 10 with Alu housing: 47-54 Nm
Tightening torque for valve size 10 with Steel housing: 74-81 Nm

Description

flow divider / combiner - pressure compensated
Division ratio 50 % : 50 %
Max. deviation at $Q > 40\%$ Q_{max} : $\pm 2.5\%$
