

Properties	
Design	Sandwich body valve pilot-controlled
Operating pressure	max. 350 bar
Volumetric flow	max. 100 l/min
Connection	ISO/Cetop 05 size 10

## Note

These valves must be set according to the application.

## **Description**

Sandwich body valve for constructing sandwich arrangements with ISO/Cetop 05 size 10 valves

The pressure balance maintains a constant pressure differential between connection P and connection A or B of the valve, to ensure that a constant flow rate is maintained in the event of pressure variations. The control pressure is diverted by the built-in shuttle valve.

## Ordering information

Further sandwich body valves available on request
