HK SU 2
Pump supports

Properties

Use	For European standard gear pumps BG2

Description

Pump supports are employed on gear pumps that are driven e.g. by V-belts or chains and are thus subject to higher radial loads.
A corresponding coupling hub is required for the connection between pump and pump support. (Please order separately!)
Grease according to DIN 51502 is recommended for lubrication.
Connection only for European standard pumps.

Item

Identification	for pump	A (mm)	B (mm)	C (mm)	D (mm)	E (mm)	F (mm)	G (mm)	H (mm)	Hub	Shaft	Weight (kg)
