Built-in heating with fixing magnets

Properties	
Design	internal temperature controller (preset at 20°C)
Scope of supply	incl. connection cable 3-pole and cable entry M20x1.5
Use	for preheating of hydraulic oil

Description

For horizontal or vertical installation below the oil surface Simple retrofitting in existing tanks, no draining of the oil necessary Switching precision $\pm 3\,\,\%$

Surface load 1.2 W/cm2 for hydraulic oils
