

HK V2 572

Throttle valve

Properties

Design	Steel version with precision valve spindle suitable for control panel installation
Operating pressure	up to 400 bar

Note

These valves must be set according to the application.

Description

Precise volumetric flow control or barring in both directions

Metallic seal without leakage, linear opening cross-section

Precise throttling over a wide flow rate range

The setting is made via a decimal scale from 0-9 on the underside of the setting knob and a reference scale A to C from 0 to 4 on the valve shaft for exactly reproducible settings

The hex. socket head screw in the setting knob serves for locking

An additional lock nut is available for control panel installation
