MK
Measuring cone for O-rings

Properties

Design	Measuring cone for O-rings

Description

With the measuring cone set MKS5-284, all popular O rings within the diameter range of 5 - 285 mm can be measured.
In order to comply with the demands made on a measuring device an especially tough high-quality material was used for its manufacture.
The measuring cone set is comprised of seven individual segments which can be inserted into each other for storing or transportation.
When set up, a measuring tower of maximum 1.64 m is formed.

Item

Identification	Measuring range
MKS 5-284	5 - 284 mm
MK 5-44	5 - 44 mm
MK 45-84	45 - 84 mm
