

| Properties | |
|--------------------|---|
| Design | pressure-compensated |
| Material | Housing: Cast iron Inside parts of steel |
| Operating pressure | max. 250 bar |

Note

These valves must be set according to the application.

Description

With these 3-way flow control valves, the preferred oil flow (P) is held constant irrespective of the incoming oil flow (IN). The residual oil flow (B) can be diverted to the tank or used for an ancillary consumer Division: max. 75 % of quantity from IN to P, min. 5 l/min to P
