

Properties	
Design	pressure-compensated with additional secondary pressure relief valve
Material	Housing: Cast iron Inside parts of steel
Operating pressure	max. 250 bar

Note

These valves must be set according to the application.

Description

With these 3-way flow control valves, the preferred oil flow (P) is held constant irrespective of the incoming oil flow (IN). The residual oil flow (B) can be diverted to the tank or used for an ancillary consumer Division: max. 75 % of quantity from IN to P, min. 5 l/min to P
