

# HK DI 20

Safety and isolation block with manual relief

Properties	
Design	Safety valve
Operating pressure	max. 400 bar
Additional feature	with TÜV certification
Material	Seal: VITON

**Note**  
Safety valve is preset; observe the maximum pressure when allocating to the corresponding accumulator!

**Description**  
The safety and isolation block is used to protect, shut off and discharge hydraulic accumulators. It is designed and manufactured in accordance with Directive 2014/68/EU (PED), Article 3 Para. 3 and takes into account the European safety regulations for the operation of hydraulic accumulators. Discharging the accumulator is done manually at a ball valve or a relief valve.  
Viscosity of the fluids must lie within the following limits:  
min. 10 mm<sup>2</sup>/s, max. 380 mm<sup>2</sup>/s

**Ordering information**  
Caution! Please order adapter for corresponding accumulator separately!

Item
