

HK DI 20

Safety and isolation block with manual relief

HANSA FLEX

Properties

| | |
|---------------------------|------------------------|
| Design | Safety valve |
| Operating pressure | max. 400 bar |
| Additional feature | with TÜV certification |
| Material | Seal: VITON |

Note

Safety valve is preset; observe the maximum pressure when allocating to the corresponding accumulator!

Description

The safety and isolation block is used to protect, shut off and discharge hydraulic accumulators. It is designed and manufactured in accordance with Directive 2014/68/EU (PED), Article 3 Para. 3 and takes into account the European safety regulations for the operation of hydraulic accumulators. Discharging the accumulator is done manually at a ball valve or a relief valve.

Viscosity of the fluids must lie within the following limits:

min. 10 mm²/s, max. 380 mm²/s

Ordering information

Caution! Please order adapter for corresponding accumulator separately!

Item

| Identification | p max. (bar) | M1 | M2 | P | S | T | Weight (kg) |
|-------------------------|-----------------|------|------|----|----------------------------|------|----------------|
| HK DI 20 M 330 B | 330 | 1/2" | 1/4" | 1" | M 33x2 cylinder connection | 3/4" | 6,8 |

pmax: Safety valve is preset, – observe the maximum pressure when allocating to the corresponding accumulator!
