

Properties				
Design	Safety valve			
Operating pressure	max. 400 bar			
Additional feature	with TÜV certification			
Material	Seal: VITON			

Note

Safety valve is preset; observe the maximum pressure when allocating to the corresponding accumulator!

Description

The safety and isolation block is used to protect, shut off and discharge hydraulic accumulators. It is designed and manufactured in accordance with Directive 2014/68/EU (PED), Article 3 Para. 3 and takes into account the European safety regulations for the operation of hydraulic accumulators. Discharging the accumulator is done manually at a ball valve or a relief valve.

Viscosity of the fluids must lie within the following limits:

min. 10 mm2/s, max. 380 mm2/s

Ordering information

Caution! Please order adapter for corresponding accumulator separately!

Item							
Identification	p max.	M1	M2	Р	S	Т	Weight
