

# HK BM C0

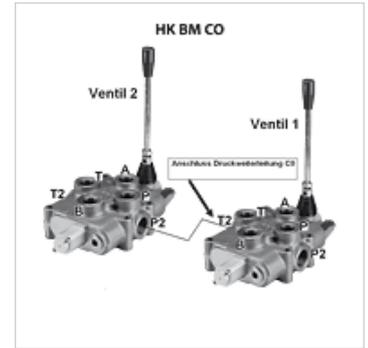

Pressure transmission for hand-operated directional control valve BM

**HANSA FLEX**

## Properties

Scope of supply with O-ring

Material Steel

## Description

The pressure transmission is suitable for linking monobloc valves type HK BM together. In this situation, the pressure transmission on valve 1 is screwed into the oil port T2. The return flow to the tank on valve 1 must be connected to the top port T1.

If valve 1 is not actuated, another function can be controlled at full pressure and volume flow using valve 2. If valve 1 is actuated, then no pressure is available at valve 2.

## Item

Identification	for valve type	Weight (kg)
HK BM40 C0	HK BM40	0,10
HK BM70 C0	HK BM70	0,10
HK BM150 C0	HK BM150	0,15

## Accessory for following products

HK BM40	Hand-operated directional control valve BM 40
HK BM70	Hand-operated directional control valve BM 70
HK BM150	Hand-operated directional control valve BM 150
