

HK FI AD E0/EV

Adsorber filter single use without valve

HANSA FLEX

Properties

Design	Disposable with activated charcoal filter Integrated filter element 3 µm
Connection	at bottom
Installation position	vertical
Temp. range	-40 °C to +70 °C
Material	Housing: Aluminium and acrylic Gasket: NBR

Note

Design bases are medium, air flow rate or clunk pick-up volume.

To replace the adsorber cartridge, the connector remains on the machine.

Other variants with housing in aluminum or stainless steel as well as for aggressive media are available on request.

Description

These adsorber filters are used for the ventilation of hygroscopic substances of any kind.

Ordering information

For tank mounting the mounting flange HK FI AD FS must be ordered if necessary.

Additional information

In the adsorber the water molecules contained in the air are bounded in the pores of the adsorbent (silica gel). The saturation (charging) and then the necessary replacement of the filter cartridge is indicated by a color change from orange to green.

The valve system prevents unnecessary water absorption from the ambient air during the standstill times. This allows longer service lives of the adsorbent filling.

Silica gel consists of about 99 % of silicon dioxide (SiO₂) and is classified as a synthetic polar and hydrophilic desiccant. It possesses due to its high porosity, a large internal surface area of up to 800 m²/g. This enables a very high water holding capacity.

In adsorber filters silica gel is often added with a color indicator. Color changes indicate the water content and therefore the progress of the loading of the desiccant.

According to EU legislation (Regulation EC No 1272/2008) silica gel is not classified as a dangerous substance. It is not subject to classification according to EC Directives (67/548/EEC and 1999/45/EC). Silica gel is not among the health and environmentally hazardous substances.

Item

Identification	Design	Air volume (L/min)	(L)	for tank size	(kg)	A (mm)	B (mm)	C (mm)	G	Weight (kg)
HK FI AD 005 E0 N AF	without valve	5	0,12	≤ 100 litres	0,3	164,0	90,0	96,0	G 3/4"	0,8
