HK BFS 30
Flow switch

Properties

Operating pressure	max. 250 bar
Operating temperature max.	120 °C
Material	Brass

Note

To avoid the risk of measure faults, the upstream line should be 10x ND and the downstream line 5x ND. (ND = internal tube diameter)

Description

Flow switch for any mounting position for liquids from 30 up to 600 cSt.
Changeover contact (250 V / 1,5 A / 50 VA)
Protection class IP 65
Measuring accuracy ±10 % of range limit value
