K-SPIR SCHL DREH VERSCHRAU V

Spiral hose, with swivel adapter and kink protector, braided

Properties

Pneumatic Type Operating temperature with kink protector, swivel type -40 °C to +74 °C

HANSA/FLEX

Note

...

Further information on request

Description

Standard type or with braided reinforcements for high pressures. These exceptionally elastic polyurethane hoses boast a recoil force similar to that of conventional nylon spiral hose, but with less tendency to loop and significantly better resistance to abrasion. There is consequently less danger of scratching coated or sensitive surfaces. The hose is extremely flexible and non-kinking.
