

# K-GRUNDEJEKTION SBP-C ELK

Basic ejector »SBP-C« with blow-off valve and electronic vacuum switch, with integrated silencer

**HANSA FLEX**

## Properties

**Properties** Vacuum generator with a single nozzle, available in six power ratings, with a high maximum vacuum value (85%)  
 Connection of compressed air and vacuum with push-in coupling  
 Basic housing with connection facility for a vacuum switch  
 Maximum suction capacity with minimum compressed air consumption  
 Minimum size, low weight  
 Various power ratings for optimised air consumption

**Application** For universal use in handling systems with very high dynamic movements  
 Handling all kinds of air-tight components  
 For use in separation systems where space is restricted.  
 \nConstruction of ejector blocks for centralised or decentralised individual control of suction pads.

**Nozzle system** Brass

**Connection** Push-in coupling

**Silencer** Plastic

**Body** Impact-resistant plastic

## Description

Purely pneumatic vacuum ejector that operates on the Venturi principle. Compressed air enters the ejector at A and flows through the nozzle B. This results in a vacuum immediately behind the nozzle outlet, and air is drawn in through the vacuum inlet D. This air and the driving air leave the ejector via the silencer C.
