Further information on request

## **Description**

Manual adjustment of the blow-off pressure (lock nut).

## **Ordering information**

For use on devices that have to be vented whenever they are turned off, either because of safety regulations or for technical reasons. The pneumatic devices are disconnected from the system and simultaneously vented each time they are shut off.

## Additional information

These blow-off valves can also be supplied with a fixed setting and a TÜV type test number. Please ask for an offer.
