

# K-DRV GEW V RAENDEL

Unidirectional flow control valves, incoming air restriction (»V«), screw connection

**HANSA FLEX**

## Properties

|   |                                    |
|---|------------------------------------|
| Operating pressure                        | Max. 10 bar                        |
| Temp. range                               | 0 °C to +70 °C                     |
| Hollow screw, pivot arm, regulating screw | Nickel-plated brass                |
| Internal parts                            | Brass with a bare metal surface    |
| lip seal O-ring                           | NBR                                |
| Seals (non-detachable)                    | Polyamide (glass fibre-reinforced) |

## Note

Further information on request

## Description

For fine regulation of a cylinder piston speed in the forward and return motion and precise control of flow rates. Designed as a banjo-type valve with a hollow bolt and ring piece. Can be screwed directly onto the valve or cylinder. Compact type of construction, also ideal where space is restricted. On the version with a knurled screw, the set volumetric flow rate can be locked with the hexagon nut to obtain a fixed setting.
