

# K-DIFFERENZDRUCK-DRUCKFLUSS HANSA

Differential pressure flow meter

Properties	
Measuring system	Defferential pressure method
Operating pressure	0 - 16 bar
Temp. range	0 °C to +50 °C
Media	Compressed air, neutral gases
output flow rate	Analogue 0 to 10 V or 4 to 20 mA
Operating voltage	24 V DC
Display	background lighting

**Note**  
Further information on request

**Description**  
Differential pressure measuring system for detecting changes in flow rate or consumption and measuring leakage and energy efficiency. There is a differential pressure at the sensor as soon as a fluid starts to flow. Fast and accurate measurements can be achieved in this way. This robust instrument in a modern design offers a high level of safety (codable) and requires no maintenance.

Item		
Identification	Operating pressure	Measuring range
K- 07 25 19 51	0 - 16 bar	150 - 2000 l/min
K- 07 25 19 52	0 - 16 bar	200 - 5000 l/min
