

# K-DIFFERENZDRUCK-DRUCKFLUSS HANSA

Differential pressure flow meter

**HANSA FLEX**

## Properties

**Measuring system** Defferential pressure method

**Operating pressure** 0 - 16 bar

**Temp. range** 0 °C to +50 °C

**Media** Compressed air, neutral gases

**output flow rate** Analogue 0 to 10 V or 4 to 20 mA

**Operating voltage** 24 V DC

**Display** background lighting

## Note

Further information on request

## Description

Differential pressure measuring system for detecting changes in flow rate or consumption and measuring leakage and energy efficiency. There is a differential pressure at the sensor as soon as a fluid starts to flow. Fast and accurate measurements can be achieved in this way. This robust instrument in a modern design offers a high level of safety (codable) and requires no maintenance.

## Item

Identification	Operating pressure	Measuring range
K- 07 25 19 51	0 - 16 bar	150 - 2000 l/min
K- 07 25 19 52	0 - 16 bar	200 - 5000 l/min
