

K-RD STUECKE PP

Reducers

Properties

Working pressure on request

Operating temperature Max. +20 °C

Material Polypropylene (PP)

Sealant NBR

Note

Further information on request

Description

Lightweight, push-in fittings distinguished by high strength, toughness, resistance to abrasion and impact resistance - ideal for a wide range of applications. Plastic and metal tubes are connected together quickly and easily. Suitable for compressed air or liquids, with good resistance to a large number of chemicals.

Item
