

# K-W TUE VB PP

Union elbows

**HANSA FLEX**

## Properties

|                       |                    |
|-----------------------|--------------------|
| Working pressure      | on request         |
| Operating temperature | Max. +20 °C        |
| Material              | Polypropylene (PP) |
| Sealant               | NBR                |

## Note

Further information on request

## Description

Lightweight, push-in fittings distinguished by high strength, toughness, resistance to abrasion and impact resistance - ideal for a wide range of applications. Plastic and metal tubes are connected together quickly and easily. Suitable for compressed air or liquids, with good resistance to a large number of chemicals.

## Item
