

HK OILAIR 2000

Oil-air cooler

HANSA FLEX

Properties

Design	with compact electric motor
Oil inlet temperature max.	120 °C
Static working pressure max.	20 bar

Note

For type HK OILAIR 2005 K no direct thermostat mounting is possible.

Description

Cooling element standard, without bypass
Cooling performance and pressure drop see chart

Ordering information

Cooler without thermostat, please order separately!

Additional information

The cooling capacity curves are based on the oil temperature at the cooler and the concurrent air temperature. For example, for an oil temperature of 60 °C and an air temperature of 20 °C, the differential temperature is 40 °C. To calculate the total cooling capacity, multiply this value by the cooling capacity in kW/°C.
