# SKM HM ED AGRAR

Plug-in coupling sleeve

# Properties

Properties					
Application	Agricultural technology Industry				
Connection 1	metric cylindrical outer thread				
Sealing form 1	Shape E				
Standard	complies with ISO 7241 series A				
Operating pressure	max. 250 bar				
Volumetric flow	max. 240 l/min, in combination with SKS Agrar				
Additional feature	Limited pressure loss High-flow valve uni Mechanical locking system Push-pull function interchangeable with Parker RSD 501 can be coupled under pressure				
Temp. range	-30 °C to +100 °C				
Material	Steel				
Surface	electro galvanised				

#### Note

With standard threaded connections in determining the operating pressure of the maximum rated pressure is taken into account.

## Description

The newly developed single-hand coupling sleeve can be engaged in the coupling connector under full operating pressure. Further advantages include the breakaway function and the lower coupling and uncoupling force.

## Additional information

The coupling Agrar exceeds the requirements of ISO 7241-1 series A and ISO 5675 for the agricultural sector and is uncompromisingly designed for maximum efficiency. The Agrar male connector and Agrar sleeve system achieves a maximum volumetric flow of 240 litres per minute - a record level. Operation in heavy-duty tractors and implements such as tippers, is now safe.

The coupling sleeve is available in two different overall lengths and is therefore compatible with the common commercially available built-in couplings.

Item								
Identification	DN*	Connecting thread	AF	Size	L1	L2	SF coup.*	Weight
			(mm)		(mm)	(mm)		(kg)
