OEL R20

Mineral oil-based hydraulic oil

Properties

Application	as universal oil, e.g. hydraulic presses, injection moulding machines, construction machinery etc.
Classification	HLPD
Additional feature	Especially suitable for systems with sensitive control valves.

Note

Note: Do not mix different oils.

Description

Detergent hydraulic oil based on mineral oil containing agents against corrosion, oil ageing and wear.

Additional information

The detergent properties remove deposits from the hydraulics and prevent adhesion. HLPD oils demonstrate a unique property of absorbing certain amounts of water without causing operating problems in the hydraulic system.

Item

Identification	Viscosity class	Packaging unit
OEL R 20	ISO VG 46	20 litres
