

# OEL R20

Mineral oil-based hydraulic oil

## Properties

<b>Application</b>	as universal oil, e.g. hydraulic presses, injection moulding machines, construction machinery etc.
<b>Classification</b>	HLPD
<b>Additional feature</b>	Especially suitable for systems with sensitive control valves.

## Note

Note: Do not mix different oils.

## Description

Detergent hydraulic oil based on mineral oil containing agents against corrosion, oil ageing and wear.

## Additional information

The detergent properties remove deposits from the hydraulics and prevent adhesion. HLPD oils demonstrate a unique property of absorbing certain amounts of water without causing operating problems in the hydraulic system.
