

# W90 HJ LOET

Tubuladura de soldadura blanda, ángulo de 90°

**HANSA FLEX**

## Características

|                             |                                  |
|-----------------------------|----------------------------------|
| Conexión 1                  | Rosca exterior UN/UNF            |
| Forma de obturación 1       | Cono exterior 74°                |
| Conexión 2                  | Conexión de enchufe de soldadura |
| Construcción                | Tubuladura de soldadura          |
| Forma constructiva          | Ángulo de 90°                    |
| Material                    | Acero                            |
| Protección de la superficie | aceitada                         |

## Artículo

| Denominación      | Ø exterior tubo (mm) | G1             | SW (mm) |
|-------------------|----------------------|----------------|---------|
| W90 HJ 04 LOET 06 | 6                    | 7/16" -20 UNF  | 11      |
| W90 HJ 05 LOET 10 | 10                   | 1/2" -20 UNF   | 13      |
