Precisión	± 0.2% ± 1 digit of span
Tipo de protecc.	IP 65
Suministro corriente	From 4 to 20 mA loop of transmitter

Nota

Otras especificaciones a petición.

Descripción

The digital plug-in display is freely programmable and easily mounted, and can therefore be retrofitted in a very short time without any problems, even if the transmitter is already in use. No external power supply is required. Suitable for all 4 to 20 mA transmitters with a right-angle connector. Freely programmable by means of keys inside the display.
