## Pressure reducing valves

### Características

Presión de entrada	Max. 15 bar
Conexión	G 1/4 internal / external
Material	Latón

### Nota

Dependent on the input pressure P1, the initial pressure P2 can vary between -20% to +20%  
Otras especificaciones a petición.

### Descripción

Industry, trade and repair shops often require working pressures of 15 bar or less. These pressure reducing valves, which are screwed directly onto the tool, enable the actually necessary working pressure to be set. <br>Benefits: Significantly reduced risk of accidents, Longer tool life with fewer malfunctions, Lower noise levels at the workplace.
