

K-ZFL VENTILINSEL HDM

Intermediate plates for HDM valve terminal

Características

| | |
|----------------------------------|---|
| Medios | Filtered, unlubricated or lubricated compressed air. If lubrication is used, it must be continuous. |
| Presión de funcionamiento | Max. vacuum 10 bar (external pilots), 3 to 7 bar (internal pilots as standard) |
| Presión de control | 3 - 7 bar |
| Rango de temperatura | -10 °C to +60 °C |
| Flujo de paso | 200 NI/min (Ø 4), 500 NI/min (Ø 6), 800 NI/min (Ø 8) |
| No de controles | Max. 16 (e.g. 16 spring return valves) |
| Accionamiento aux. manual | Latching (bistable), Monostable (non-latching) version also available on request |
| Consumo de potencia | 0.6 W per pilot |
| Tipo de protecc. | IP 65 |

Nota

Otras especificaciones a petición.

Descripción

These compact valve terminals, with a maximum flow rate of 800 NI/min, can be individually adapted to the specific conditions of each application thanks to the wide range of functions and various input and intermediate plates. Since each valve terminal is a customer-specific combination of a series of individual elements, the catalogue only lists the available input, intermediate and end plates as well as the different valve discs and the 25-pin multi-pole connectors.

Información adicional

Important: The scope of supply does not include a connector. Please order separately.

Artículo

| Denominación | Función |
|----------------|--|
| K- 07 15 22 51 | With additional pilots and exhausts |
| K- 07 15 22 52 | With separate pilots (for multi-pressure systems) |
| K- 07 15 22 44 | With separate exhausts (for multi-pressure system) |
