| Presión de funcionamiento | Max. 50 bar |
| Roscas interiores | acc. ISO 7-1 |
| Material | black steel ST 37-2 |

Nota

Otras especificaciones a petición.

Descripción

The steel fittings are made of tubular steel to DIN 2441 and boast good resistance to mechanical stresses. Hot dip galvanised steel fittings are completely coated with a layer of pure zinc and are therefore suitable for drinking water. They are also protected against rust. They are used in pipe construction, plumbing and gas installations as well as a wide range of industrial applications, especially in conjunction with the popular malleable iron series.
