

K-PROFI REINIGUNGSPISTOLE

Professional industrial spray gun

HANSA FLEX

Características

Presión de servicio	Max. 24 bar
Temperatura de servicio	Max. 50 °C
Flujo de paso	25 l/min (at 5 bar)
Carcasa	Brass with a bare metal surface
Inserto de válv.	chromium steel
Revestimiento de caucho	EPDM

Nota

Otras especificaciones a petición.

Descripción

Ideal for cleaning in industry and manual trades. The thick rubber coating provides thermal insulation for the hot or cold water flowing inside as well as impact protection. The flow rate is controllable with the adjustment screw (using a coin). The steel shackle allows the lever to be latched for extended use. Also suitable for drinking water.
