

K-ADA HUTPROFIL

Adapter for DIN rail

HANSA FLEX

Omadused

Vahendid	Filtered, unlubricated or lubricated compressed air. If lubrication is used, it must be continuous.
Töö rõhk	Max. vacuum 10 bar (external pilots), 3 to 7 bar (internal pilots as standard)
Juhtimisrõhk	3 - 7 bar
Temperatuuri ulatus	-10 °C to +60 °C
Läbivool	200 NI/min (Ø 4), 500 NI/min (Ø 6), 800 NI/min (Ø 8)
Kontrollide arv	Max. 16 (e.g. 16 spring return valves)
Käitsi juhitav	Latching (bistable), Monostable (non-latching) version also available on request
Võimsustarve	0.6 W per pilot
Kaitse tüüp	IP 65

Vihje

Lisaandmed saate soovi korral.

Kirjeldus

These compact valve terminals, with a maximum flow rate of 800 NI/min, can be individually adapted to the specific conditions of each application thanks to the wide range of functions and various input and intermediate plates. Since each valve terminal is a customer-specific combination of a series of individual elements, the catalogue only lists the available input, intermediate and end plates as well as the different valve discs and the 25-pin multi-pole connectors.

Lisateave

Important: The scope of supply does not include a connector. Please order separately.
