

# K-DRV ABLD GEW C RAENDEL

Unidirectional flow control valves, outgoing air restriction (»C«), screw connection

**HANSA FLEX**

## Caractéristiques

|  |                                    |
|--|------------------------------------|
| Pression de service                          | maxi 10 bar                        |
| Plage de température                         | 0 °C to +70 °C                     |
| Boulon creux, bras oscillant, vis de réglage | Nickel-plated brass                |
| Pièces internes                              | Brass with a bare metal surface    |
| Joint torique à lèvres                       | NBR                                |
| Joints d'étanchéité (imperdables)            | Polyamide (glass fibre-reinforced) |

## Remarque

## Description

For fine regulation of a cylinder piston speed and precise control of flow rates. Designed as a banjo-type valve with a hollow bolt and ring piece. Can be screwed directly onto the valve or cylinder. Compact type of construction, also ideal where space is restricted. On the version with a knurled screw, the set volumetric flow rate can be locked with the hexagon nut to obtain a fixed setting.
