

LKM IR ST DK

Manchon d'accouplement à fiches (air) avec sécurité

HANSA FLEX

Caractéristiques

Construction	Manchon d'accouplement rapide à fiches
Raccord 1	filet int. BSP cylindrique
Raccord 2	
Pression de service	maxi 12 bar
Débit d'air	1.800 l/min (at 6 bar and $\Delta p = 1$ bar)
Température de fluide	-20 °C to +70 °C
Boîtier	Aluminium, anodised
Filets	Nickel-plated brass
Pièces internes	Stainless steel
Bouton, vanne	Hardened, galvanised steel
Matériau étanche	NBR

Remarque

Not suitable for hitting / pulsating tools.
Autres informations sur demande.

Description

High-quality, robust and durable, one-hand quick disconnect safety couplings for high flow rates. When it is pressed for the first time, air is relieved from the coupling but the plug in the coupling remains locked. The plug is only disconnected when the pushbutton is pressed for the second time. The dreaded "whiplash effect" is avoided and the risk of injury to the operator virtually eliminated. The safety version conforms to ISO-Standard DIN EN ISO 4414.
