

## Karakteristike

|                                      |                                                             |
|--------------------------------------|-------------------------------------------------------------|
| Ulazni tlak                          | Max. 16 bar                                                 |
| Radna temperatura                    | Max. 30 °C                                                  |
| Veličina pora u filteraskom elementu | 90 µm                                                       |
| Kućište                              | Brass                                                       |
| Kućište sita                         | Special impact-resistant plastic                            |
| Drugi podatci                        | DVGW Certificate (K-07250556 and K-07250557 no Certificate) |

## Napomena

Drugi podatci na zahtjev.

## Opis

For filtering drinking and domestic water in addition to well, process and cooling water for once-through cooling systems. These filters protect the water pipes and all water-carrying parts of the system on the downstream side against malfunctions and corrosion damage.
