

# K-DMUF ALLGEMEIN

Pressure transmitters for universal industrial applications, nonlinearity 0.25%

**HANSA FLEX**

## Karakteristike

|  |  |
|--|--|
| Tip  | S-20   |
| Napon  | DC 8 ... 36 V  |
| Električni priključak                        | With right-angle connector acc. to DIN EN 175301-803 A |
| Vrsta zaštite                                | IP 65 acc. to EN 60529                                 |
| Izlazni signal                               | 4 to 20 mA, 2-wire                                     |
| Nelinearnost                                 | up to 0.25% of span                                    |
| Temperatura medija                           | -30 °C to +100 °C                                      |
| Okolna temperatura                           | -40 °C to +70 °C                                       |
| Dijelovi koji dolaze u dodir s mjernom tvari | CrNi steel 1.4571                                      |
| Kućište                                      | CrNi steel 1.4571                                      |

## Opis

Pressure transmitters, very high precision, in CrNi steel, for complex measurement tasks in the process industry as well as research and development. Applications: Low temperature or outdoor applications, extreme shock loads and vibration levels, corrosive media in the chemical industry. Compatible with all internationally established process connections.

## Dodatne informacije

Further measuring ranges on request

There are also pressure converters with cooling fins available optionally on request for high media temperatures (up to +150 °C).
