

**Caratteristiche**

|                              |   |
|------------------------------|---|
| Velocità di scorrimento max. | 0,5 m/s                                   |
| Temperatura min.             | -30 °C                                    |
| Temperatura max.             | 80 °C                                     |
| Mezzi                        | Oli minerali                              |
| Montaggio                    | viene inserito in una scanalatura aperta  |
| Materiale                    | (1) Bussola: Acciaio<br>(2) Paraolio: PUR |
| Applicazione                 | Idraulica                                 |

| Toleranz / Tolerance |    |            |
|----------------------|----|------------|
| d                    | D  | L          |
| h11                  | H8 | +0,20<br>0 |

**Descrizione**

Scarso bisogno di spazio.  
Considerevole resistenza all'abrasione.  
Soluzione semplice.
